**THE MIGHTY LIGHT**

The Mighty Light consists of the Flash Head and the power supply. The Flash Head is standard, but the Power source varies. The Mighty Light AC uses Flash Head and the AC box. The Mighty Light Battery Unit consists of the Flash Head, Battery Pack, and the Combination Unit consisting of AC, Box Battery, Pack.

The Speedlight is only seven inches high; no thicker than a broom-stick. Any standard flash gun ring or clamp can be attached on the Mighty Light Flash Head. With the new "Big Shot" Reflector Tube, it weighs only 8 ounces.

With the basic lightweight pack, the Mighty Light will give 2,000 flashes and with the battery rejuvenator accessory which sells for only \$3.00, you will receive approximately 100% longer life to a set of batteries. The Rejuvenator can only be used in conjunction with the AC box.

SPECIFICATIONS

Flash Duration	1/1000
Recharging Time/Sec.	5 seconds
No. Flashes per Battery	2000

PHOTOFLOOD BLUE**REFLECTOR PHOTOLAMPS**

PHB #1	.45	PHB #2	.70	PHB #4	1.95
--------	-----	--------	-----	--------	------

Have their own built-in reflector. The Reflector Photoflood RFL-2 gives a smooth, broad (60°) controlled beam, about equal to a #2 Photoflood in an average reflector. It is recommended for all-around use.

The Reflector Photospot RSP-2 is ideal for movies. Its light has been "squeezed" into a narrow beam (20°) over seven times greater in intensity than that of the Reflector Photoflood.

G-E's new 375-watt, medium beam reflector photoflood lamp is designed especially for use in 4-lamp brackets. It puts maximum even light in the picture area without overloading home lighting circuits.
