16 mm Slide Projector

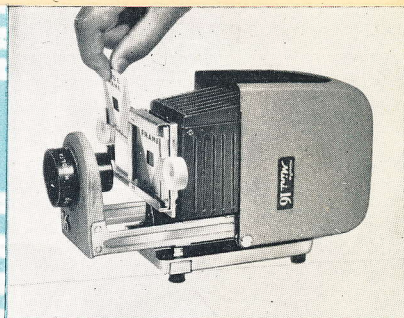

www.butkus.us
How to use the Minolta Mini 16

Depress the top cover release (5) on both sides and simultaneously lift the top cover (1).
Lift the Lamp house cover (2).
Insert lamp (75 W.) in lamp housing.

Drop the slide carrier onto the carrier receiver (3).

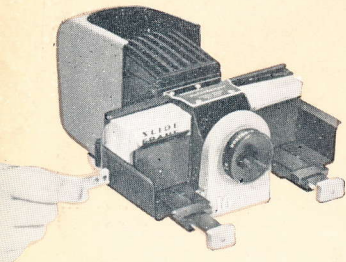

Place slides in the slide carrier.

Various Usages

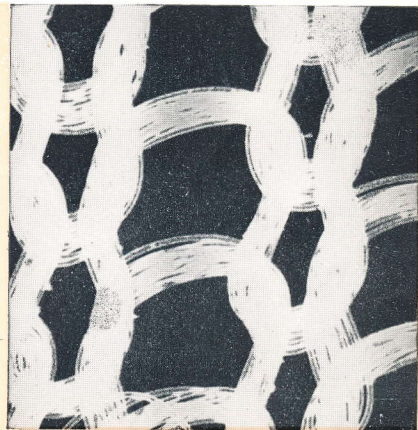

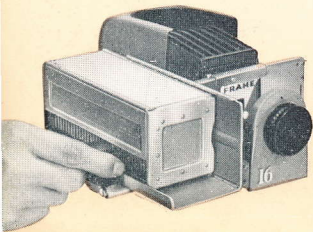

Auto-Changer

If you want to show several pictures in sequence, use an "Auto-Changer." Place the mounted slides into right hand section of the "Auto-Changer." Then, as you move the lever in and out, slides are sent to the viewing position and then stocked in the left hand section.

Airequipt Adapter

To use an "Airequipt", changer, first attach the adapter, as you would any other carrier and then insert the tongue of the Airequipt changer in the channel. When the window of the changer is in proper position, tighten the set screw. The adapter comes with every projector.

As a Handy Microscope

Above photo shows the projected image of Nylon Stocking at the projecting distance of about 7 ft.

On-line camera manual library

This is the full text and images from the manual. This may take 3 full minutes for the PDF file to download.

If you find this manual useful, how about a donation of \$3 to: M. Butkus, 29 Lake Ave., High Bridge, NJ 08829-1701 and send your e-mail address so I can thank you. Most other places would charge you \$7.50 for a electronic copy or \$18.00 for a hard to read Xerox copy.

This will allow me to continue to buy new manuals and pay their shipping costs.

It'll make you feel better, won't it?

Turn the lens barrel till you get a clear picture on the screen.

To change the slide, just push the knob of the carrier. Keep replacing the already projected slides with new ones and you will be projecting in a continuous sequence.

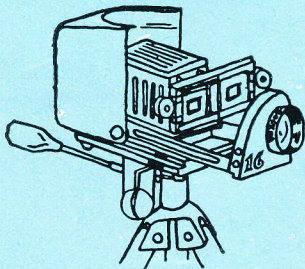

If you like

Set your projector on a tripod, which will adjust the projector to any position you want.

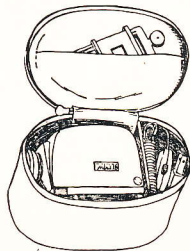

joy for the entire family

Big picture projection
...even in a small room

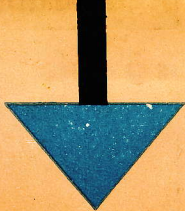

Distance	Length of the picture seen
3 ft.	ab. 1 ft.
5	1.6
10	3.1
15	4.6

Can also be used
on tripod

Yet, so small and light
