Rolleicord Vb

With this versatile Rollei you have five picture formats in one camera — for roll and for miniature film. That means greater scope, more flexibility and no problems of picture size. That is what makes the Rolleicord Vb so popular.

It is also a Rollei at an amazingly low price — a further point in favour of the Rolleicord Vb. You first buy the basic outfit, and then extend it at any time later on — for instance with the Rolleilux, the accessory exposure meter combined with a lens hood.

You are no doubt familiar with the idea of the Rollei system from our colour catalogue “Rollei 2¼ x 2¼ inches — its assets and yours”. This listing of features is a special supplement for it.

Rolleicord Vb with Xenar f/3.5 lens .................................................. 530 011
Ever-ready case ................................................................. 970 070
Carrying strap ................................................................. 570 140
16-exposure outfit ......................................................... 208 300
24-exposure outfit ......................................................... 208 500
Rolleikin outfit .............................................................. 208 850
Rolleilux .............................................................. 201 010
Lenses:  Taking lens: 75 mm. Schneider Xenar f/3.5, four elements, angle of view 55°. Finder lens: 75 mm. Heidosmat f/3.2. Size I bayonet fitting (6 x 6) for accessories.
